## *Your Green Career is Our Future: Green Jobs Career Readiness for Young People*

The main specific project objectives of the GreenRead project are:

- To support awareness raising actions for young people in transitioning towards green economy;
- Improve necessary skills and competences of young people in order to support their own green jobs career;
- Improve necessary skills and competences of YECs, VETs, TVETs and HEIs in order to support young people's green jobs career readiness process;  
To support main target groups in order to become a successful green economy requires the consistent

The main objective will be achieved by creation of several outputs:

- Full investigation and Development of Green Skill Response Strategies for Job Career Readiness Report;
- Producing Green Read Digital Training Materials and Try Out Sessions
- Increased awareness of public regional, national and European bodies on the urgency to facilitate the transition into green economy and adopting EU legislations.

The main motivation of our project is to guide young people, YECs, VETS, TVETs and HE institutions to develop a successful career readiness path that would contribute to green career development of the primary target group. The Green Read project is designed to provide new advice to young people, their schools, employers and other stakeholders on how to best prepare young people to compete in the Green and Ecological labor market. Young people today have never left education more ambitious and highly qualified, but even before the pandemic many struggled to find good work. The COVID-19 crisis has made it still more urgent for us to help young people prosper as they move through education and into the labor market in the age of green developments.

On 30th and 31st of March, 2023, the partners of GreenRead project met in a mixed setting, in Berlin and online, in order to know each other and start working together within the project frame.

The Agenda of the meeting included all relevant aspects of the project, including main objectives, aimed results, the timeline of the project and the distribution of the project activities and tasks.
